Skills

Technical knowledge	React Js, Next Js, JavaScript, HTML, CSS, Bootstrap, TailwindCSS, Firebase, UI
Basic Concepts	OOP, Database, Data structure, S.E, Testing
Tools	VS Code, PyCharm, NetBeans, MS Word, Git and GitHub.
Personal Skills	Problem-solving, Reasoning analysis, Communication, Management

Education

Khwaja Fareed University of Engineering and Information Technology, R. Y. Khan

BS in Computer Science   (2018-2022)

Professional Experience

Devbion (Frontend Web Developer):   (Sep'23 - Feb'24, May'24 - Jul'24)

As a Frontend Web Developer at Devbion. I was responsible for writing reusable components powered by ReactJS/NextJS and developing custom designs using popular UI kits.

Alethea AI (React Js Internship):   (Jun'23 - Aug'23)

Excelled in React JS during my 3 months internship at Alethea AI, contributing to projects and gaining valuable real-world experience in web development.

Nanosoft House (React Js Internship):   (Oct'22 - Jan'23)

I've done my internship at Nanosoft House, aimed to enhance both my professional & personal skills.

Projects (More on my GitHub):

Home Automation with Voice Controls(FYP):   This project was especially for disabled people. One can control home appliances using voice through Google Assistant as well as from a web dashboard from anywhere around the world.

Bevy Express: As a React/Next JS Developer, I played a key role in building a dynamic e-commerce platform with Next JS, enhancing user experience and platform functionality through the creation and integration of various components. This project significantly expanded my development skills and contributed to the platform's success.

Topers Notes: I have worked on a project called TopersNotes as a Junior ReactJS Developer. TopersNotes is an educational website, and it's a huge platform to offer various courses & and notes for students and learners.

LeadLytics Business Site: I've developed this business website for a client that connects companies with potential leads, facilitating data collection and growth. The website is designed for simplicity and effectiveness, providing valuable services for business expansion.

My Portfolio in Next Js: I have built my Portfolio in NextJS & and used TailwindCSS for styling. Feel free to visit my portfolio umarashraf.vercel.app to find out more about me.

Strengths & achievements

- Good communication skills.
- Hard-working and ability to grasp new skills quickly.
- Managing the relationship with the team and clients.
- Voluntarily participated in NGO-based societies and events.
